

Delta Star Introduces North America's Most Advanced Oil Processing Rig "New Quick Response"

Electrical transformer manufacturer Delta Star unveiled a new rapid response field trailer designed to meet a growing demand for maintenance and repair of key electrical grid facilities nationwide.

Delta Star has been known for having the best equipment available on the market. Today Delta Star Field Service boasts an impressive 10 company trucks, including three state of the art oil processing trailers. These processors are industry leading assets and boast the following:

- Up to 50 GPM Oil Processing
- Inhibitor Injection Systems
- Oil Heating Systems
- Dual Variable Speed Vacuum Pumps

Delta Star rigs are highly advanced equipment designed to allow our technicians to complete any transformer oil processing work with ultimate control and with impeccable quality.

The largest processor will be on display at the upcoming 2011 Doble "Life of a Transformer" Conference and Exposition in Orlando, Florida in February. We welcome you to come and evaluate the quality of our equipment yourself!

Quick response. Delta Star engineers are available to assist with diagnostic analysis, condition or life assessment and cooling or component retrofits. With locations in Virginia and California, Delta Star can offer immediate assistance to customers anywhere in the continental United States.

FIELD SERVICE CAPABILITIES (PARTIAL LIST)

- Engineering Services
- Substation Maintenance
- Transformer Monitoring
- Removal & Relocation
- Painting, Regasketing & Component Retrofits
- Oil Processing and Analysis
- Electrical Testing
- Turnkey Installation
- LTC Inspection & Repair
- Cooling System Repairs & Upgrades
